

Community Housing of Maine (CHOM) = Supportive housing and advocacy. 78 properties, 77 include supportive housing. 42% of 1036 people housed live in supportive housing. Largest housing provider for homeless populations in Maine.

Village Centre, Brewer – Second largest passive house in North America upon completion in 2016.

Elm Terrace, Portland – LEED Platinum Historic Rehab. Blended supportive housing.

Meracy

Partnerships

CHOM partnered with Meracy Health System bringing the McAuley Residence - a 25 year old successful program serving vulnerable populations - to the residents of Elm Terrace.

The McAuley Residence is a unique and comprehensive supportive program for 15 individuals (and their children) who have faced significant challenges. Services in the McAuley Residence are wide-ranging and broadly collaborative, and they include support from traditional community providers such as Crossroads and the Opportunity Alliance, and non-traditional support such private banks helping with money management education and nutrition and meal preparation experts teaching weekly classes.

There are about 15 different whole life supports that complement wellness and promote long term stability. Since the McAuley Residence is a two-year program, every year Elm Terrace can expect to pull about 7-8 more people from vulnerability to permanent stability through this intensive collaborative intervention.

Danforth on High, Portland – 55 and older populations. Blended supportive housing.

Knights Court, Bangor – Cutting edge handicapped accessibility. Pioneering community inclusion, within two blocks of everything.

Parish House, Bar Harbor – Historic Rehab. Community inclusion, within a block of everything.
